## Some of 2017's Biggest Stories

*As the year draws to a close and the news cycle continues to reset every day, let's pause and revisit some of the most important news events from 2017.*

### The Inauguration

On Jan. 20, 2017, Donald Trump was sworn in as the 45th president of the United States. The real estate and reality TV mogul's inauguration speech contained many of the same themes he had espoused as a candidate: taking power away from the political establishment and giving it back to the people; taking a tougher stance on crime, gangs and drugs; bringing jobs back to America; and,

As more than 22,000 people shook and shimmied at the Route 91 Harvest festival concert on Oct. 1, a gunman positioned himself high above them in a room in the Mandalay Bay resort, then opened fire on the crowd. When the gunfire ended, 58 people were dead, more than 500 wounded and the shooter had killed himself.

It was the deadliest mass shooting in modern U.S. history, surpassing the number of people

### The Charlottesville Protests

On Aug. 11, a group of white supremacists with lit tiki torches marched across the University of Virginia's campus to protest the removal of a statue of Confederate Gen. Robert E. Lee. They chanted "you will not replace us." Counter-protesters showed up and fights broke out between the two groups.

This was foreshadowing for the violence that would explode at the next day's white nationalist "Unite the Right" rally in Charlottesville. A car plowed into a group of people demonstrating against the rally, killing 32-year-old Heather Heyer and injuring at least 35 other people.

of thousands of women descended on the National Mall and smaller groups gathered in other cities around the world to show resistance to Trump's agenda and express support for women's rights.

**The #MeToo Movement**

As the number of sexual assault and harassment accusations against Hollywood producer Harvey Weinstein grew over the first weeks of October, a hashtag started trending on social media: #MeToo. Activist Tarana Burke launched the "Me Too" movement 10 years ago, as a way to help survivors of sexual abuse have a voice. Now, people around the world were using the hashtag to underscore how pervasive and damaging sexual abuse is for women.

**The California Wildfires**

On Oct.8, one of the worst fire seasons on

record erupted in California. Seven wildfires swept across Northern California, killing at least 44 people and destroying nearly 9,000 homes and other buildings. The fires weren't fully contained until the end of October. It is now the deadliest wildfire in the state's history.

on Dec. 4 and quickly became "among the top five largest fires in California history," NPR's Kirk Siegler reported a week later. The wildfire was 60 percent contained as of Dec. 20, and had already consumed 272,000 acres and destroyed more than 1,000 structures, according to the California Department of Forestry and Fire Protection.

It started in 2016 with

**The Russia Probe**

In May, former FBI Director Robert Mueller was given a new high-profile, high-pressure assignment — as the special counsel responsible for the government's investigation into Russian meddling in the 2016 presidential election, and the possibility that members of the Trump campaign might have been involved. He and his team of lawyers have been digging into those questions ever since, as political feuds erupt on Capitol Hill over Mueller's actions and the future of his investigation.

Much of their work takes place behind closed doors, but the charges that Mueller has brought so far suggest that he has "flipped" several former Trump associates,

Colin Kaepernick, the San Francisco 49ers quarterback who decided to kneel as the national anthem played before NFL games, in protest of police brutality. This sparked outrage among some who accused him of being anti-American and anti-military. Kaepernick left the 49ers and became a free agent. He later filed a grievance against the NFL and team owners, accusing them of colluding to shut him out of the

persuading them to cooperate as he investigates their old colleagues. There are a mind-boggling number of people, agencies and investigations involved — NPR broke down many of the key players here. Currently there are far more questions than answers, and all eyes are on Mueller's team to see what they uncover (although it's not clear that the general results of the probe will ever be public.)
